- Antioxidant effects protecting against free radicals
- Improves inorganic powders hydrophobicity
- Low refractive index for natural matte effect
- Small particle size for better dispersion and skin feel
- Reduces tackiness
- Reduces the dryness effects of mineral powders
- Benefits of the Lysine amino acid delivered to the skin

INCI name: Lauroyl Lysine

The Science Behind Textify™:

Textify™ LALY is a pure powder of Lauroyl Lysine, with a unique honeycomb-like structure and hexagonal particle shape which contribute to its skin adherence, antioxidant, and hydrophobic properties. Its small particle size and low refractive index provides a natural and matte appearance on the skin.

Usage and Application:

Textify™ LALY can seamlessly integrate into a wide range of beauty routines, including skin care, makeup, and hair care applications. This texturizing agent offers numerous benefits, such as enhanced skin feel with a silky sensation, increased slipperiness and softness, improved adhesion to the skin, water and sweat resistance, and conditioning effects. These attributes make Textify™ LALY a valuable addition to any beauty product.
